THAT'S THE POWER OF PLUS

SMSplus[®]

+

FDMplus[®]

Powered by CAPACG

THE ONLY COMPLETE, AFFORDABLE SAFETY MANAGEMENT SYSTEM
AND FLIGHT DATA MONITORING PACKAGE READY TO IMPLEMENT.

Baldwin
AVIATION

Pulling It All Together

Where **SMSplus**[®] focuses on the human, more subjective side of safety, **FDMplus**[®] monitors a pilot's performance by measuring adherence to SOPs and aircraft limitations – uncovering threats and errors that would otherwise go unnoticed.

FDM... The Silent Mentor[®]

FDMplus[®] is an indispensable risk management tool that allows operators to identify threats and mitigate risks through flight data analysis. **FDMplus**[®] helps pilots and maintenance personnel learn from situations, gives them timely feedback that helps with Continual Aviation Proficiency, and shows them how they can improve maintenance operations, safety and training.

The Power Of Plus

By combining the power of **SMSplus**[®] and the power of **FDMplus**[®], flight organizations improve the overall efficiency and safety level of their flight operations while reducing fuel, maintenance and insurance costs.

Clients have the option to subscribe to either or both programs.
